RAHUL KUMAR

React Developer

@ irahulkv@gmail.com   in irahulkv   ○ github.com/irahulkumar1

✆ +91-9955956721   ● Noida, Uttar Pradesh

React developer with 1+ years of experience in developing web applications that are engaging and interactive. Proficient in creating scalable and robust React applications, implementing responsive UI designs, and writing code that is both clean and maintainable. Demonstrated ability to work collaboratively with cross-functional teams to deliver high-quality software solutions.

WORK EXPERIENCE

React Developer
Pando India Software Consultants 🔗

📅 Sep 2022 – Present   ● Noida, UP

- Developed and maintained **Earning Beats**, a foreign stock market research website with role-based login, portfolio management and single sign-on (SSO) capabilities.
- Refactored and modernized **Traiystats** using the latest technologies. Optimized the REST API and reduced network requests, resulting in a 30% improvement in load time for Traiystats. This increased user engagement and provided a smoother experience.
- Reduced the number of bugs in both applications by 60% through testing by the testing team and debugging. This resulted in improved code quality and greater reliability of the platforms.
- Demonstrated strong problem-solving skills, identifying and resolving complex technical issues independently or as part of a team. Contributed to code reviews, providing constructive feedback to team members to ensure high-quality code.
- Refactored and implemented new features in both application while adhering to best practices and coding standards. Recreated legacy code using modern technologies, which made the code base more scalable and maintainable.
- Continuously improving skills and keeping up-to-date with emerging technologies and industry trends, including JavaScript, TypeScript, React, TanStack Query, Redux, HTML, CSS, and Tailwind.

Full Stack Web Developer
NMS Games Private Ltd 🔗

📅 Nov 2021 – July 2022   ● Varanasi, UP

- Developed and maintained a game dashboard using React, Node.js, and MySQL, which allowed users to view game statistics and performance data.
- Designed and implemented REST APIs to enable seamless communication between the front-end and back-end systems.
- Deployed code to AWS EC2 instances and managed the AWS infrastructure to ensure optimal performance and uptime.
- Continuously learned new technologies and techniques to improve code quality and maintainability.

Full Stack Web Developer Trainee
Fynd (Shopsense Retail Technologies Pvt. Ltd. a Reliance backed company) 🔗

📅 Aug 2021 – Oct 2021   ● Mumbai, Maharashtra

- Developed an event management website as part of a 10-week web development training program.
- Led the development of both frontend and backend using MEVN stack (MongoDB, Express.js, Vue.js, Node.js).
